

Unlusted — UI Visual Brief

Hey! Wireframes are almost done, so before we move into UI design I want to make sure the visual direction matches your vision. This should take about 5 minutes.

Visual Style

Which visual direction feels right for Unlusted?

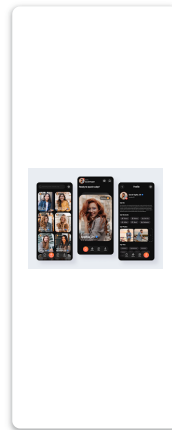

1. Which visual style resonates most with you? *

Pick one. If you want to add a reference image later — just drop it in the comments at the end.

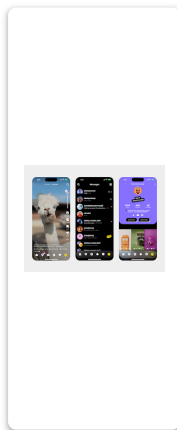

Mark only one oval.

Dark Premium — deep blacks, gold or purple accents, confident typography. Think Revolut, Apple Music.

Minimal Dark — clean and spacious, subtle accents, refined feel. Think Spotify, Calm.

Bold & Playful — high energy, strong colors, expressive. Think TikTok, OnlyFans.

2. Anything you'd like to add about this choice?

e.g. "I like the energy of Neon but want it to feel more premium" — any nuance helps.

References

Apps and products you find visually appealing — outside the adult industry.

3. Which apps or products do you use daily that you find well-designed? *

e.g. banking apps, social media, fitness, streaming — anything you open and think "this looks great".

4. Any specific links, screenshots, or Dribbble references you'd like to share?

Not required, but very helpful. Paste URLs or describe what you like about them.

Current Design

What to keep, what to leave behind.

5. Is there anything in the current Unlusted design you'd like to keep or build on?
Could be a color, a component, a feeling — anything that already works for you.

6. Is there anything in the current design you strongly dislike and want to move away from?
